

CELL PHONE COVER

Using our Tissue Decoupage Paper
www.blackberrydesigns.com

By Dea Shelton

Supplies:

Blank Cell Phone Cover
Tissue Decoupage Paper- Blackberry Designs
Elmer's Glue-All
Small Scissors
Brown Solvent Ink Pad - Staz-on
Stamps
Rhinestones

Most of these supplies can be found at your local craft store. Blank cell phone covers can be found at Walmart, Target and many discount stores.

Step 1

Wash your cell phone cover with soapy water and dry well.

Step 2

Cut images from our tissue cover and layout images in an

decoupage paper. Open cell phone arrangement that you like.

Step 3

Put your Elmer's Glue All on a plastic plate or piece of wax paper, add water to the consistency of thick cream. Apply glue to backside of image. The image will curl slightly, then relax in about 15 seconds. Apply a generous amount of glue to the front and back of image, using your fingers (make sure your fingers are not dry---dip your fingers in the glue) apply the image face up on the cell phone cover and smooth with your fingers working out the wrinkles and airbubbles. Continue to apply your images until done.

Step 4

If you have any excess glue, you can clean that up with a wet cello kitchen sponge. We cut our kitchen sponges into pieces. Let cell phone dry.

Step 5

Apply one more coat of glue to the images, let dry.

Step 6

You can now stamp any words or sayings using a On Ink Pad and rubber stamps. We glued heart shaped rhinestones to the phone. Everyone is going to want to know where you got this unique cell phone cover. I use this one on my phone and I get that question all the time.
