

MERMAID CIGAR BOX PURSE

Using our Tissue Decoupage Paper

www.blackberrydesigns.com

By Dea Shelton

Step 1

Start by preparing your surface. Remove

hardware from box. Lightly sand box and feet with fine sand paper. Seal with an all-purpose acrylic sealer, let dry. Lightly sand again.

Step 2

Paint wood box with white paint. Sponge White & Blue paint on lid and inside box using a stippling effect.

Step 3

Cut out your tissue decoupage paper designs. Use a small pair of embroidery scissors. Pre-arrange your designs on your surface. (Once you decoupage your design it cannot be removed.)

Step 4

Slightly water down your Elmer's glue-all. Apply thin coat of glue to the back of your cutouts, let set for 5 seconds until the paper uncurls.

Step 5

Apply glue to surface of wood box and back of paper. Adhere paper to surface, apply coat of glue to front of image. With your fingers gently remove wrinkles working from center toward ends. Make sure your ends are sealed to surface. Clear up any excess glue with damp cloth. Let dry for 1/2 hour

Step 6

Using a single stroke, Apply one thin coat of decoupage glue to surface of design with a soft brush, let dry. Let cure for 48 hours. Apply two coats of water based semi-gloss varnish with a soft brush. I like Minwax semi-gloss water based varnish. Let dry.

Step 7

Attach handle and hardware. Glue charms to box with Elmer's glue-all and tie various colors of small ribbons and yarns to handles.
