### Supplies

**Regular and Mini Domino's** (purchase at any discount store)

**Blackberry Designs Domino Collage Sheets**

**Scissors**

**Modge Podge or Elmer's Glue-All**

**Bic Permanent Markers or**

**Krylon Leafing Pens**

**Water based glossy varnish**

**E-6000 Glue**

**Wax Paper**

**Jewelry Bracelet findings**

**Jewelry Pliers**

**Charms, beads, & other embellishments**

### Step 1

Clean your domino with hot water and soap, dry. Cut out your images to fit the Domino, from our Domino sized Tissue Collage sheets. Lay your image face down and apply a coat of Modge Podge or water down Elmer's Glue-All to the Domino (side without the dots), also apply glue to your domino collage sheet.

### Step 2

Put lots of glue on your fingers (this makes it so the paper will not stick to your fingers and lift your paper images), put your collage sheet (image side up) on the domino, adding glue to the front of the sheet and apply with fingers smoothing out any wrinkles or air bubbles (your glue will dry clean and seal your image). Let dry for 2 hours.

### Step 3

Using your permanent felt tip marker or Krylon Leafing Pen, apply pens to sides of domino. Also put a thin edge around the front of your image, this will make the piece look "finished". Let dry.

### Step 4

Apply 2-3 coats of a glossy water based varnish to the front and sides of your domino. I like Delta that you can buy at your local craft stores. Let dry.

### Step 5

Lightly sand the back of your domino. Glue your jewelry findings to the back using E-6000 glue. Add your charms, bails and chains. We used bracelet connectors, filigree pieces and bails, glued them to the back and attached our charms, beads and chain with jump rings. Once done, we took black felt, cut to fit our domino, dipped it in Elmer's Glue-All and covered the back for a finished look. If any of the what part of the domino continues to show, just cover it with your pens. Here is the bracelet extenders we used on the back of our bracelet. We cut off the single loop on the one side and used the three loops to connect.

It makes the bracelet lay flat and gives a beautiful jewelry finish to your piece. We picked up these bracelet findings at our local craft store (Micheals).
